**Total Culling Concept group, the solution**

## AED-RF2™

The RF2 machine is specially designed for the termination of stock in the event of contagious diseases or the outbreak of an epidemic.

The RF2 consists of 4+4 drums 4 interchangeable lids, 1 analyser and an equipment trolley. The installation of the system is based upon the demands of a cull; fast, economical, easy to operate, easy to clean and efficient. All these demands are amply met.

The RF2 system is in no way compromised in its task of culling stock humanely. The machine meets all the European requirements regarding culling.
